DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Lichtenwalner, U.S. PN 6,006,163 (herein after '163) cited by applicant.

Regarding to claimed invention, '163 teaches a method of detecting damage feature within a structure comprising embedded plurality of piezoelectric ceramic sensors to the structure 23, the analog sensor produced by the sensors, i.e. "sensor response" and the signal is digitized by the data acquisition system 24. The phase and amplitude of each signal is further computed in processing section 26 for determining presence or absence of damage as shown in figure 2, also see col. 5, lines 56-62 and col. 6, lines 20-45.
